

APC InfraStruXure® Central

An IT-ready, scalable monitoring system that collects, organizes, and distributes critical alerts, surveillance video and key information, providing a unified view of complex physical infrastructure environments from anywhere on the network.

Available in three appliance platforms:

- Up to 525 devices
- Up to 2,025 devices
- Up to 4,025 devices

Most robust, modular enterprise class monitoring platform.

InfraStruXure Central enables an efficient way for organizations to monitor their company-wide multivendor physical infrastructure: power, cooling, security, and environment.

Real-time monitoring, user-defined reports and graphs, and instant fault notification and escalation enable quick assessment and resolution of critical infrastructure events that can adversely affect IT system availability.

This centralized repository of critical information can be accessed by multiple users from anywhere on the network, creating a consolidated view of the physical infrastructure.

The platforms can grow with changing business needs through additional device licenses and add-on surveillance, capacity management and change management modules.
