

Wavestore Crystal

The Crystal range addresses the requirement to record analogue, multi-megapixel or IP(network) cameras into a single recording and management system simultaneously.

Crystal incorporates the new HiNet capability enabling various formats of video & audio data to be recorded within the same infrastructure with minimal start up costs.

The Crystal range is an entry level product that is ideal for applications such as shops, business premises and schools where a surveillance and recording capability is required.

Integrated Analogue and IP Camera Recording

Wavestore product range features include:

- Real-time recording and playback on every input (up to 50ips PAL, 60ips NTSC)
- Super-fast FIND of images, even with many terabytes of storage
- Simultaneous analogue and IP cameras into a single recorder
- Network up to 256 recorders directly (thousands of cameras)
- True multi-server view and control; full IP compatibility with existing systems
- Massive internal storage (up to 8TB), optional network 'mirror' storage
- Alarms by dry-contact, RS-232, or IP
- Powerful SDK for third-party integration, or customisation
- Lip-synch audio with every camera
- Simultaneous multiple languages on screen
- Intelligent configurable video motion detection
- Switchable spot outputs for TV monitors
- Extensive range of PTZ protocols
- Areas of interest search of recorded images
- Privacy masking; removable by authorised user
- High reliability design for continuous dependable operation
- Multiple Network Bridging
- Long operational life - hardware and software upgradeable
- Total System Flexibility - Easy to use set up routines
- Support for IP and megapixel cameras from Arecont, Axis, Sony, Lumenera, IQEye, Mobotix and more
- Seamless Integration - Expandable up to thousands of cameras and thousands of microphones
- Local or remote monitoring and control support on Linux, Windows or Mac (using *EVIS*) platforms
- Can be networked with previous Wavestore designs and many other legacy systems

Crystal - Key Features

- Up to 16 analogue camera inputs (50 to 400 ips PAL or 60 to 480 ips NTSC)
- Up to 32 IP and megapixel camera inputs
- Up to 3000 Gigabytes of internal storage
- Remote management software included

D 540mm x
W 435mm x
H 178mm

Designed for critical recording and management applications requiring high quality image recording and fast access to archive data.

Supplied in a stylish case for applications where the unit is required to blend in with the surroundings
