

Wavestore Topaz

The TOPAZ range is designed to provide a high performance recording capability together with a larger data storage (required when retaining images from megapixel cameras). Wavestore's powerful software enables images to be dynamically located from the archive, whilst the recording function is fully operational.

It is a compact and versatile real-time or time-lapse digital video and audio recording solution that is configurable to record up to thirty two megapixel and IP camera data streams simultaneously.

Topaz is a high performance recording solution with an extensive range of features that enables video images to be reviewed and analysed in great detail and with a clarity not previously attainable.

Compact IP and Megapixel Camera Recorder

Wavestore product range features include:

- Zoom into megapixel and IP images during recording and playback
- Linux OS offers the highest reliability and protects against virus attacks
- Remote view software provides secure internet access from anywhere
- Dual Gigabit Ethernet Network for LAN/WAN/Wireless
- Integrated and cost effective alternative to NAS storage systems
- Easy copying of images and video clips
- Super-fast image FIND functions
- Supports Intel® Core™2 Duo processors
- Real-time recording rates on multiple cameras
- "Around-the-clock" recording confidence assured
- MTBF in excess of 100,000 hours

Combinations of IP and Megapixel cameras from different manufacturers can be recorded simultaneously with different recording profiles, together with date, time and camera details overlaid. IP and Megapixel Camera manufacturers include Avigilon, Arecont, Axis, IQEye, JVC, Lumenera, Mobotix, Panasonic and Sony.

The system provides an easy and intuitive interface that enables users with limited experience of recording equipment to be able to select and copy video clips to DVD or Mass Storage Device.

Topaz is ideal for IP and megapixel camera recording applications requiring a compact and high performance design that is easily configurable and rapidly installed. Typical applications include industrial and commercial premises, schools and universities, custodial monitoring and office monitoring & recording.

Designed for critical recording and management applications requiring high quality image recording and fast access to archive data in a compact design.

Hard drives are installed with front-loading caddies to facilitate easy removal, exchange and retention.

Topaz - Key Features

- Up to 64 IP and megapixel camera inputs
- Up to 4000 Gb of internal storage
- High quality video clips and still images
- Remote monitor (Client) software included
